

**Department of Mathematics, Statistics and Computer Science
St. Francis Xavier University
Presents**

**Lessons from 10 years of experience as a
St. F. X. math grad**

by

Adrian MacKenzie

Class of 2002

St. Francis Xavier University

Monday, November 12th @ 2:15 in Annex 23A

A graduate from St. F. X. with a degree in mathematics, statistics and computer science in 2002, Mr. MacKenzie will describe his academic and professional experiences in the decade since that time, from being a new grad with no long-term plans to his current work in international health policy research. Included will be descriptions of a number of the health research projects in which he have been involved. Based on these experiences, he will offer some recommendations for consideration.

Refreshments will be served before the talk in AX24A
